

Application options:

There are six options available when running the RAD application:

- i (input path) -> use provided log location instead of default
- p -> return a prediction of the events analyzed
- s -> Do not delete log files after analyzing them
- f (input file) -> Only analyze the file given
- a -> Analyze all logs files in the target folder (not recommended)
- h -> Displays Program Usage information

Installation instructions can be found in [Installation_Guide.pdf](#)
